**NON-FINAL REJECTION**

***Claim Objections***

Claim 5 recites the limitation "the evaluated part" in line 15 of the claim. There is insufficient antecedent basis for this limitation in the claim. The Examiner believes the limitation should read --the evaluated test parts-- or --the evaluated test tubes--.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claimed subject matter of "wherein the film is selected from commercially available films available in various levels of pressure sensitivity" does not clearly point out the meets and bounds of the claim. The terms "commercially available" does not distinctly point out what films may be selected because different films could be selected or available during difference times. Further, the terms "various levels of pressure sensitivity" does not clearly point out what level of pressure sensitivity is chosen.

***Allowable Subject Matter***

Pending overcoming the objection to claim 5 above, claims 5-8 and 10 are found allowable.
